

Dear Luys Scholars and Alumni:

We are proud to announce about the **Armenia. Create Together (A.CT)** initiative to be held on **July 11-15, 2016 in Armenia.**

The Ministry of Diaspora of the Republic of Armenia in cooperation with ABGU, LUYS and AYB foundations has initiated **Armenia. Create Together (A.CT)** platform that calls upon the Armenian global network of scientists, engineers, artists, researchers and professionals to unite in Armenia, explore the power of ideas, collaborate and develop startups that would create solutions for current and emerging challenges.

We believe that together we will start discovering unexploited resources within each of us and learn how to weave our collective potential to apply to the development of Armenia and the world.

A.CT is about the 21st century Generations of Armenian Thinkers and Doers worldwide coming together in Armenia to offer their best expertise, learning from one another and addressing today's universal challenges.

Every year A.CT will be featuring creative “Experience Ateliers” that will harness the power of the Armenian Nation and its untapped creativity to solve the most pressing problems of our century together.

A.CT will be launched on **July 11-15, 2016**. The “Experience Ateliers” are selected on the following 3 directions:

- Medicine and Health (*lead by Luys Foundation*)
- Engineering - Technology Development (*lead by AGBU*)
- Advocacy and Media (*lead by the Ministry of Diaspora of the RA*)

Participation in the activities of the “Experience Ateliers” is based on participant’s academic and professional background. **Luys Alumni and Scholars are encouraged to participate in the fields of their interest and expertise.**

If you are interested in participating in ACT initiative, please contact us at dat@luys.am.

Looking forward to working and creating together in Armenia!

Sincerely,
Co-organizers
